# ANIMAL LAW AND SOCIETY

Is a professional specialisation programme which aims to train experts in animal-related professions. It is based on a comparative law perspective, while bearing in mind the needs of society as a whole.

derecho  
ANIMAL

The master is highly interdisciplinary and seeks to provide integrated training in the knowledge of animals in the fields of law, ethology, nutrition and welfare, ethical dimensions, artistic representations and entertainment, organisation and social responsibility.

The master is heavily focused on practical sessions, since it aims to train professionals in handling the new challenges posed by society and its relation with animals. The programme is addressed to those interested in developing a profession related to animals, providing them with the necessary theoretical and practical skills demanded by a society in constant communication and increasingly aware of the role a humane treatment to animals represents for sustainable development and for a peaceful coexistence.
